Ficam® D Insecticide Dust

Date of Issue: September 1st, 2006

1. IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND SUPPLIER

Product name: Ficam® D Insecticide Dust

Other names: None

Product code: 4208446 (10 kg) Chemical group: Carbamate

Recommended use: An insecticidal dust used for the control of a range of household pests, European wasps

and certain insects of bananas.

Formulation: Dust (D)

Supplier: Bayer Environmental Science – A Business Group of Bayer CropScience Pty Ltd ABN 87

000 226 022

Address: 391 - 393 Tooronga Road, East Hawthorn

Victoria 3123, Australia

Telephone: (03) 9248 6888 Facsimile: (03) 9248 6800

Website: www.bayercropscience.com.au
Contact: Technical Manager (03) 9248 6854

Emergency

Telephone Number: 1800 033 111 – Orica SH&E Shared Services

2. HAZARDS IDENTIFICATION

NON-HAZARDOUS SUBSTANCE - NON-DANGEROUS GOOD

Not flammable.

Hazard designation: Not classified as hazardous according to criteria of Worksafe Australia.

Risk phrases: Not applicable Safety phrases: Not applicable

ADG classification: This product is not classified as a Dangerous Good under the Australian Code for the

Transport of Dangerous Goods by Road and Rail.

SUSDP

classification: Schedule 5 (Standard for the Uniform Scheduling of Drugs and Poisons)

3. COMPOSITION / INFORMATION ON INGREDIENTS

Ingredients:	CAS Number:	Concentration (g/kg):
Bendiocarb	[22781-23-3]	10
Talc	[14807-96-6]	>500

Ficam® D Insecticide Dust

Date of Issue: September 1st, 2006

4. FIRST AID MEASURES

If poisoning occurs, immediately contact a doctor or Poisons Information Centre (telephone 13 11 26), and follow the advice given. Show this Material Safety Data Sheet to a doctor.

Inhalation: Remove person to fresh air. If signs of poisoning occur get medical attention immediately.

Persons assisting the patient should protect themselves from contamination. If advised by doctor or Poisons Information Centre, atropine tablets may be administered. Artificial

respiration may be required.

Skin contact: If poisoned by skin absorption, remove any contaminated clothing, wash skin thoroughly

with soap and water and continue flushing with water for at least 15 minutes. Seek medical attention if irritation develops or persists. If signs of poisoning occur get medical attention immediately. Persons assisting the patient should protect themselves from contamination. If advised by doctor or Poisons Information Centre, atropine tablets may

be administered.

Eye contact: Rinse immediately with water for at least 15 minutes and seek medical advice.

Ingestion: Wash out mouth with water. Keep patient at rest and seek urgent medical advice.

Transport patient to doctor or hospital quickly. If advised by doctor or Poisons Information Centre, atropine tablets may be administered. DO NOT attempt to give anything by mouth

to a semi-conscious or unconscious person.

First Aid Facilities: Obtain an emergency supply of atropine tablets 0.6 mg.

Symptoms: Bendiocarb belongs to the carbamate group of insecticides, which are

acetylcholinesterase inhibitors. Inhibition of acetylcholinesterase results in accumulation of

the neurotransmitter acetylcholine in the central and peripheral nervous system.

Symptoms of poisoning include Mild intoxication causes headache, blurred vision, weakness, sweating, mild chest pain, nausea and vomiting. Severe intoxication causes cyanosis, muscular twitching, spasms, miosis and respiratory paralysis. Onset of symptoms may be delayed. Cholinesterase inhibition sometimes persists for several

weeks.

Medical attention: Basic aid, decontamination, symptomatic treatment and if necessary administration of

antidote (atropine).

Note for physicians

Endotracheal intubation should be done and gastric lavage performed, followed by administration of charcoal. Treatment is with atropine sulphate. Additionally diazepam should be given in case of seizures/convulsions. Atropine should not be given to a cyanosed patient. Monitor respiratory, cardiac and central nervous system functions. Monitor red blood cell and plasma cholinesterase levels. Administer oxygen if necessary. Watch for pulmonary oedema and delayed neurological symptoms. Contraindications include eximps (proliferyman children) guarantee placetide and eminophylling.

include oximes (pralidoxime, oblidoxime), succinyl chloride and aminophylline.

Ficam® D Insecticide Dust

Date of Issue: September 1st, 2006

4. FIRST AID MEASURES - continued

Medical attention continued:

2 regimens for initial atropine treatment are currently suggested, in both cases the cessation of the cholinergic symptoms salivation, bronchial secretion, sweating and bradycardia indicates sufficient atropinization. The skin should be dry, the lungs should be clear on auscultation and the heart rate should be in a range of 80 to 100/minute. Overdoses of atropine have to be strictly avoided, as these can promote heart rhythm disturbances.

Regimen 1: (2-10 mg atropine i.v., followed every 15 minutes by 2 mg atropine i.v. until cessation of the symptoms.

Regimen 2:

- 2 mg atropine i.v., 5 minutes wait, if symptoms persist or reappear
- 4 mg atropine i.v., 5 minutes wait, if symptoms persist or reappear
- 8 mg atropine i.v., 5 minutes wait, if symptoms persist or reappear
- 16 mg atropine i.v., 5 minutes wait, if symptoms persist or reappear
- 32 mg atropine i.v.

No higher doses of atropine should be given nor are necessary.

For children, the dosage has to be more careful due to a higher sensitivity of children to atropine. The initial dose should be 0.1 mg/kg body weight, then careful repletion or increase depending on the reversal of symptoms as described above.

It is mandatory to allow 5 minutes after each dose for atropine to become fully effective, the next higher dose must not be given earlier and only if the above symptoms are persisting.

Regimen 2 currently is advisable. If further atropine treatment is required (taking into account the relatively short effect of carbamates), it should be done by continuous application of 1-2 mg/hour. Atropine treatment can be stopped, when the plasma cholinesterase level has returned to above 30% of normal.

FIRE FIGHTING MEASURES

Extinguishing media: Water fog or fine spray, carbon dioxide, dry chemical, foam.

Hazards from combustion products:

Fine dust may form explosive mixtures in air. The product is not flammable, but when heated above 125° C will evolve toxic fumes of methyl isocyanate. Water is the preferred extinguishing medium as it decomposes any methyl isocyanate.

Precautions for fire fighters:

Fire fighters should wear full protective gear, including self-contained breathing apparatus (AS/NZS 1715/1716). Keep unnecessary people away and move all other personnel to windward side of fire. Bund area with sand or earth to prevent contamination of drains or waterways. Dispose of fire control water or other extinguishing agent and spillage safely later.

Ficam® D Insecticide Dust

Date of Issue: September 1st, 2006

6. ACCIDENTAL RELEASE MEASURES

Dealing with spills and disposals may result in the potential for increased personal exposure. Protective clothing and equipment as described in the PERSONAL PROTECTION section should be worn. Avoid contact with spilled material or contaminated surfaces. Keep people and animals away. Prevent spilled material from entering drains or watercourses. Scoop or shovel into sealable containers for disposal, avoiding formation of a dust cloud. Clean floor with a damp cloth and place it in the recovery drum. Seal and label drums for safe disposal. Deal with all spillages immediately. If contamination of drains, streams, watercourses, etc. is unavoidable, warn the local water authority.

7. HANDLING AND STORAGE

Handling: Keep out of reach of children. Avoid contact with skin and eyes, and do not inhale dust.

Use only in a well-ventilated area.

Storage: Store product in the closed, original container in a safe, cool, well-ventilated area. Do not

store for prolonged periods in direct sunlight.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure standards: No exposure standard has been assigned by the National Occupational Health and Safety

Commission (Worksafe Australia).

WHO recommended TLV for bendiocarb is 0.2 mg/m³ (8 h) or

9.6 mg/m³ (10 minutes).

ACGIH TLV - TWA - Talc - 2.5 mg/m³

Production workers and applicators handling this product should be monitored for cholinesterase levels. A baseline level should be established prior to any potential

exposure.

Engineering controls: Control process conditions to avoid contact. Use local exhaust ventilation during

manufacture and use.

Personal Protective Eyes:

Equipment: Clothing:

Eyes: Face shield or goggles

Clothing: Cotton overalls buttoned to the neck and wrist and a washable hat

Gloves: Elbow-length PVC gloves
Respiratory: Wear a disposable dust mask

Other: After use and before eating, drinking or smoking, wash hands, arms and

face thoroughly with soap and water. After each day's use, wash

gloves, face shield or goggles and contaminated clothing.

Ficam® D Insecticide Dust

Date of Issue: September 1st, 2006

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Fine white powder. Practically odourless.

Odour: Practically odourless.

Vapour pressure: 4.6 mPa (25 °C) (bendiocarb)

Vapour density: Data not available

Melting point: 124.6 – 128.7 °C (bendiocarb)
Solubility: Insoluble; will not mix with water

Bulk density:500 – 700 kg/m³pH:Not availableFlash Point:Data not availableFlammabilityData not available

(explosive) limits:

Auto-ignition Data not available

temperature:

Octanol/water $LogP_{ow} = 1.72$ (bendiocarb)

partition coefficient:

Formulation: Ready to use dust

10. STABILITY AND REACTIVITY

Chemical stability: Ficam D Insecticide Dust is not flammable. However, fine dust may form explosive

mixtures in air.

Hazardous None

polymerisation:

Conditions to avoid: Dust / air mixtures can build up static electrical charges, and should be kept away from

volatile chemicals.

Incompatible

materials:

Volatile chemicals

Hazardous decomposition

The product is not flammable, but when heated above 125° C will evolve toxic fumes of

methyl isocyanate.

products:

Ficam® D Insecticide Dust

Date of Issue: September 1st, 2006

11. TOXICOLOGICAL INFORMATION

POTENTIAL HEALTH EFFECTS

Inhalation: Will irritate nose and throat.

Skin contact: May irritate the skin.

Eye contact: Contact with the eyes will cause tears and blurred vision. Mildly irritating.

Ingestion: Ingestion causes nausea or vomiting.

Other: None

ANIMAL TOXICITY DATA - PRODUCT:

Acute:

Oral toxicity: LD₅₀ rat: >12,000 mg/kg

Dermal toxicity: LD₅₀ rabbit: > 5,000 mg/kg

Inhalation toxicity: LC_{50} (4 h) rat: > 20 mg/L

Skin irritation: May irritate the skin

Eye irritation: May irritate the eyes

Sensitisation: Not available

Chronic:

Repeated minor exposure may have a cumulative poisoning effect. The main health effect from repeated exposure would be toxic symptoms of cholinesterase inhibition described above. Bendiocarb is not mutagenic, carcinogenic nor teratogenic.

Ficam® D Insecticide Dust

Date of Issue: September 1st, 2006

12. ECOLOGICAL INFORMATION

Fish toxicity: LC₅₀ rainbow trout: 1.55 mg/L (96 h) (Bendiocarb)

Daphnia toxicity: EC₅₀ Water flea (Daphnia magna): 0.0377 mg/l (48 h) (Bendiocarb)

Toxicity to algae: EC₅₀ Pseudokirchneriella subcapitata: 0.408 mg/l (48 h) (Bendiocarb)

Bird toxicity: LD₅₀ mallard ducks: 3.1 mg/kg (Bendiocarb)

LD₅₀ quail: 19 mg/kg (Bendiocarb)

Bee toxicity: LD₅₀ (oral): 0.1 µg/bee (Toxic to bees) (Bendiocarb)

Other: Toxic to earthworms

Environmental fate,

persistence and degradation:

Do not contaminate any body of water with this product.

Bendiocarb persistence in soil is low.

13. DISPOSAL CONSIDERATIONS

Ensure container is completely empty before disposal. Triple rinse or preferably pressure rinse containers before disposal. Dispose of rinsings in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots. Break, crush, or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit. Empty containers and product should not be burnt.
